RECOMMENDED USE

ALLER-TIL PRO SUPPLEMENT is a professional extruded feed. It is designed for semi-intensive fish farms that use fertilized "green water" as their primary source of nutrition. ALLER TIL-PRO SUPPLEMENT includes the nutrients required to facilitate higher fish growth at the end of the cycle, to maximize the farmer's profit. We recommend using ALLER TIL-PRO SUPPLEMENT once fish growth slows, which is typically at 100-150 grams.

Please note, ALLER TIL-PRO SUPPLEMENT is not a complete feeding solution. It should only be used with greenwater ponds where algae is also available for consumption and not in cages or clear water ponds. For cage farms and clear water ponds we recommend ALLER TIL-PRO CAGE and ALLER TIL-PRO POND, which are complete feeds designed for intensive production facilities.
